The greatest small engines in the world are manufactured by Briggs & Stratton. From the informal partnership Stephen F. Briggs and Harold M. Stratton formed in 1908, Briggs & Stratton has evolved into an industry leader whose name is synonymous with the lawn mower engines it pioneered.
The Legend of Briggs & Stratton, 208 pages, is filled with 125 color and 145 black & white images covering Briggs & Stratton's fascinating history. The world's largest manufacturer of the two-stroke engine may seem like an unusual jumping-off point for poetry. But Peter Culley's second book about his hometown Nanaimo stems from his realization that there is

not an hour of his waking existence when he cannot somewhere hear leaf blower, a lawn mower or another piece of Briggs & Stratton-powered machinery. This book was written in a little over a year — a year which saw droughts in Tofino, floods on the Gulf Coast & Canadian boots on the ground in the never-ending "war on terror". Meanwhile, Hammertown — Culley's half-imagined version of the place where he lives — is being ripped apart by corporate boondoggles, accelerating development and the triumph of the service economy. In Culley's bitterly lyrical poems elements of this disappearing world appear as bad jokes, snatches of song and passages of reminiscence. Old records and half-remembered films are arrayed against impending collapse. Like small and noisy engines themselves, Culley's poems address the impossible contradictions of our unnamed era. Covers 4-stroke, single-cylinder engines from the 1950s forward. (Keywords: General-Interest Manuals)
